**IMPORT HEALTH REQUIREMENTS OF BARBADOS FOR  
PHEASANT EGGS EXPORTED FROM  
THE UNITED STATES**

The pheasant eggs must be accompanied by a U.S. Origin Health Certificate for Poultry and Hatching Eggs (VS Form 17-6) issued by a veterinarian authorized by the U.S. Department of Agriculture (USDA), and endorsed by a Veterinary Services (VS) veterinarian. The certificate shall contain the name and address of both the consignor and consignee as well as the following health information:

**CERTIFICATION STATEMENTS**

1. The flock(s) of origin was (were) carefully examined and no evidence of the following diseases was found:  
  
Newcastle disease, Infectious coryza, Infectious laryngotracheitis, fowl cholera, fowl plague (highly pathogenic avian influenza), fowl typhoid, pullorum disease, Arizona disease, ornithosis, *Mycoplasma synoviae*, *M. gallisepticum*, avian encephalomyelitis, avian infectious bronchitis.
2. No outbreak of Newcastle disease or fowl plague (velogenic or highly pathogenic AI) has occurred within thirty (30) Km of the flock of origin in the past six (6) months prior to exportation.
3. The flock of origin is free of avian salmonellosis and *M. gallisepticum*.

**OTHER INFORMATION**

1. The Veterinary Services of Barbados must be notified of the expected time of arrival of the eggs so that the shipment can be inspected at the port of entry by Animal Health Personnel. (Telephone: 809/427-5073 or 5492).
2. For exotic fowl see below.
